Link to the original solution "Discussion: Dash Cam Conversation Forums Camera notices to check SD Card / Do not accept SD Card or your SD card not fully compatible with Blackvue cameras. If you have problems with your RTC battery or lithium ions, you can lose energy immediately, and your settings are lost when your camera is off. Troubleshooting Try to recharge the battery for a long period of time, several hours at least. This requires you to open the camera and suggest that you contact your retailer or Blackvue for a solution, even if the camera is out of guarantee. If you are out of warranty you can disassemble the camera and replace it yourself. If the cable is broken, your fuse has flown and needs to be replaced. See our guide for more information will empty the camera warranty! Return to the manufacturer/retailer if possible. Solution: Flash a different firmware or do not use the GPS module. The Transcend High Endurance SD card also has a great performance and reliability history on Blackvue cameras. Try downloading an earlier version of the software. The disassembly of the camera will almost always empty the warranty, but you may not have a choice as a return shipment (especially China for cheap products) may cost too much money.A118C (B40C) Video is off Focus/BlurryReason: The base of plastic lenses and housing have expanded in heat. Solution: Try to install firmware V1.011of the delegation) and check whether it fixes the problem. If there is not enough energy, the camera instantly shuts down what corrupts the file. Once replaced, your camera must work. Camera broken if you checked the and for USB cameras tried powering with a cell-phone charger, and nothing works ¢Ã bad news, your camera likely is broken. If that doesn¢ÃÂt work there may be an issue with your SD card. Link to Original Solution & Discussion: Camera Resets to Default Settings Reason: Your camera¢ÂÂs battery might be dead or your SD card is faulty. Date and Time Reset. If you need a replacement see our SD card guide. If not, you¢ÂÂll have to buy a new cable. Link to Original Solution: Dash Cam Talk Forums Solution: This problem may be corrected with a firmware update. If that doesn¢ÂÂt work it is likely a battery issue. You may have to use the cable from your vehicle. You will need to contact your manufacturer/retailer for a warranty exchange. Solution: Try using a different charger. You are not getting a good signal through the windshield or you may have wrong time zone settings. Solution: To find out if it is a card issue , try to reformat the SD card you use or try a different SD card. Some owners have added a ferrite core to reduce the problem. If you still have this problem. If you still have this problem. If you still have this problem. If you still have the problem. If Use card reader to view playback video on laptop.Step 1: Insert card into card reader.Step 2: Connect card reader with laptop.Method 2:Connect dash cam with laptop directly with package included mini USB data cable.Select ¢Â Mass Storage¢ÂÂA,click ¢ÂÂOK¢Â button.Suggestion: Download VLC media player, to view the playback video on PC more smoothlyHow to enter setting/menu pageWithout card inserted: click mune button to stop recording.Click mune button to stop recording.Click mune button to stop recording.Click mune button to stop recording. the SD card, the board camera, the board egg mini pot, the board mini egg, the board rice mini pot, no matter what the board camera brand you choose, each has its own problems. If it's nothing yet, you can have a defective unit. Link to the original solution and discussion: Review of the product Australianot Hearing A notification when the camera is off. Since we can't cover every camera, talk to your retailer or if there's a website, check that for the firmware files. BLACKVUE DR650GW / DR650S Rear Cam Color problem for the rear camera. Image not available Forcolor: to view this video Download the Flash Player Chortau B -T13 - 3 "Pantalla 1080p Dash Cam - Usage Manual - Use PDF Guide. Link to the original solution and discussion: . php? mod = ViewThread & tid = 40694 Poor Video Quality Reason: the board camera is out of focus or your SD card does not have enough writing speed. Use another card that knows it works. Here is a video of a user who has made repairs in the DR500, which is similar to DR650 and DR650GW. Some cars have loose connections, and their cable may have fallen. The manufacturer has corrected the problem and has no longer glued the speaker to the microSD slot. Solution: Repositioning the cable has helped Reduce the problem. Link to original solution and discussion: Cam Dash White White White Talk Forums Reason: Bad Update. Camera feminine, Problems with firmware. Contact your manufacturer or retailer for warranty support. Most of these cables supply 12V directly to the camera. Link to original solution and disc discussion: Dash Cam Talk Forumsdab Radio Interference Reason: Some owners complained of interferes with digital audio transmission radio. Solution: You should try a good different and well-known SD card. In modern versions of iOS or Android, your camera can stop using that network if you do not detect the Internet, your board camera will not provide. Rejecting the data or in some cases, activating the plane mode and then activating WiFi The problem will be solved that your camera does not connect to the camera on your board. Why don't you turn on my camera? Check if your 12V adapter is completely seated, check that your adapter is complete at both ends. There is no specific reason or explanation for why this happens, but it usually happens when the camera works at high temperatures. 1) You may have a defective unit. (2) You may be using a defective so card. Solution: make sure you set the right time zone for your camera. You must contact your manufacturer, where you will probably ask you to do these steps and send your like Transcend High Endurance SD card. Check if the central pin is damaged or the barrel clamps are folded in. Link to the original solution " Discussion:Xiaoyi Forums Transcend DrivePro 200 Date and Time Resets Reason: The camera is powerless in its capacitors. Solution: Try a different power cable and check that it is sitting properly and there is power going to the 12V take. See above for the arrangements it is to try to load the camera for several hours. My WiFi app does not connect the first easy solution - deactivate data When your smartphone connects to your dash camera, create a new WiFi network. Link to original solution "Discussion: Product Review Australia Error screen Yi Dash Cam: SD Card requirements Format Reason: default SD card, format editing, or incorrect file format. Trying different firmware might help. Link to the original solution " Discussion: Radar Detector Forums The camera. Solution: In most cases it means that there is a SD card number. Link to the original solution: Try using a different SD card that you know works and with Yi dash's camera. Solution: Try using a different SD card that you know works (not Sandisk Ultra cards). Updating the firmware can make your camera stop working if it is done incorrectly and you can lose the warranty. Solution: By deleting video files from the trash as well (while the SD is still on the computer). If not, you may have a defective unit and we suggest you contact the manufacturer/retailer for warranty support. Solution: Install Original U.S./Spanish Firmware. Link to the original solution "Discussion: RedditScreen/Resolution Problem- Wavy Recording at 1920x1080p@60 FPS Reason: There may be a conflict between the 60p refresh rate and the street light. The operating temperature is -10C to 60C. Solution: If there is a physical problem, you can be able to fix it with a small needle or tweezers. You may need to keep your hands away from the device. You can also purchase Blackyue brand microSD cards that are guaranteed to work but can be expensive. There is very little that can go wrong as it has no inner circuit, it is a wire with a fuse. Checking for a Fuse All the car adapters I've seen have a fuse inside the tip that inserts into the adapter of your vehicle. Solution: Try using a different solution and frame rate instead. Link to the original solution: Try using a different SD card. If enabled, try to set up a different solution and frame rate instead. Link to the original solution: Try using a different solution and frame rate instead. adjusted white balance. Solution: Buy the correct GPS. Link to the original solution: Make a reset by pressing the reset button (using a pin in the reset hole). For other cameras, you will have to drive if you do not have an electric (very uncommon) output adapter. Be sure to useBrand memory card as transcend High Endurance 32GB. 4) Your G sensor is too sensitive. Be careful during disassembly since there are springs and other small parts. Inside, the fuse is a clear cylinder with metal ends and a thin wire in the middle. Solution: adjust the camera to have approximately 1/3 sky and 2/3 earth on the screen, even if it means you have the car bell in sight. (3) Motion detection does not work properly. Solution: Check if the loop recording is enabled. Link to original solution and discussion: Dash Cam Talk Forumsvideo too dark and out of focus Reason: the lens needs adjustment, incorrect exposure values. If that doesn't work, update the firmware. Solution: Verify the advanced WiFi settings on your phone and disable SWTiching networks. If after loading, your camera quickly loses the settings, you will need to contact your retail/manufacturer, as it is a warranty problem. Why does the latest video file recorded before closing still corrupt? The most common cause is a defective SD card or your SD card do not completely delete video files. In healthy batteries after a few weeks of not turning on your camera, you will lose your charge. Link to original solution and discussion: Talk Dash Cam Forums No Warning GPS Reason: You may be using wrong GPS or have a firmware problem. The camera may be overheated. Link to the original solution and discussion: Dash Cam Talk Forumswifi short when connected Reason: Smart network features on Android will change to the rear cable. Solution: tryfirst your SD card. Reason: You may have a defective RTC battery solution: the comera will need to replace. Solution: the camera will warm up and begin. For USB cameras, this is easy if you connect to a charger. In cold weather conditions (under -10C) camera does not start. Android App Can¢ÂÂt Play Videos on Camera Reason: Operation system does not support the resolution of the video file. If that fails, try turning off the G-sensor and motion detection. You will need to contact the manufacturer/retailer for a warranty. warranty.
